

# Regina Peace Action Coalition presents:

Bruce Gagnon, coordinator of the U.S.-based Global Network Against Weapons and Nuclear Power in Space

Wednesday, December 1st at U of R Education Auditorium, 7:30 pm

## U.S. Missile Defence: Trojan Horse for Space Warfare

American activist Bruce Gagnon has been tirelessly investigating and confronting U.S. STAR WARS schemes for over twenty years.

The Regina Peace Action Coalition is pleased to have Bruce come to Saskatchewan on the 100th anniversary of the birth of Tommy Douglas – despite Cold War hysteria Tommy supported the worldwide “Ban the Bomb” petition and the call for nuclear disarmament. With impeccable foresight, Tommy realized that the path of nuclear armament was one of increasing economic and political instability and human impoverishment. Today, humanity again faces a fundamental challenge – this time we must oppose the weaponization of space.

An expert on the U.S. Ballistic Missile Defence (BMD) scheme, Bruce Gagnon will follow his presentation *U.S. Missile Defence: Trojan Horse for Space Warfare* with a dialogue with the audience. Everyone is welcome! Admission is Free!

For more info on BMD go to:
